Summary

Frontend Software Engineer with a Bachelor of Science in Software Engineering from Iowa State University, specializing in React, Next.js, and TypeScript. Built and shipped Skinstric AI, an AI-powered facial analysis app using Next.js and Tailwind CSS with end-to-end responsive UI. Experienced in component architecture, REST API integration, and production-ready frontend development across academic and professional contexts.

Technical Skills

Languages & Web: JavaScript ES6+, TypeScript, HTML5, CSS3, Java, Python, C, C#

Frameworks & Libraries: React, Next.js, Node.js, Express, Three.js, GSAP

Styling: Tailwind CSS, SASS, CSS Modules, Styled Components

Tools & Platforms: Git, GitHub, VS Code, Figma, Vercel, Linux

In Development: Jest, React Testing Library, TypeScript advanced patterns

Experience

Revolve Labs (Glencoe, MN) Jul 2025 - Present *Service Technician*

- Diagnose and resolve hardware faults in Bitcoin mining rigs, restoring non-hashing units to optimal performance through systematic component-level troubleshooting.
- Replace and configure critical components, including PSUs, control boards, and cooling systems, applying structured debugging processes transferable to frontend production issues.
- Track all repairs, performance data, and inventory updates in Google Sheets, maintaining accurate records across a fleet of machines to reduce downtime.

3M (Hutchinson, MN) May 2025 - Jun 2025 *Production Operator*

- Identified and resolved systems-level faults in production equipment under OSHA standards, demonstrating precision and attention to detail in a fast-paced environment.

Projects

Skinstric AI | [Live Demo](#) | [GitHub](#)

- Next.js, TypeScript, Tailwind CSS, GSAP: AI-powered skincare app using facial recognition to estimate demographics and deliver personalized recommendations; fully responsive with animated UI transitions.

Movieflix | [Live Demo](#) | [GitHub](#)

- React, JavaScript, CSS: movie browsing app with search functionality, movie detail views, and a modern responsive interface consuming a third-party REST API.

Drone Fleet Coordinator | [Live Demo](#) | [GitHub](#)

- Python, Django, JavaScript: web application coordinating drone fleet operations across geographic no-fly zones using pathfinding and partitioning algorithms.

Education

Iowa State University 2021 - 2025 *Bachelor of Science - Software Engineering*
